

TURKISH ENDOMETRIOSIS & ADENOMYOSIS SOCIETY

ENDOMETRIOSIS BULLETIN • OCTOBER 2023 • ISSUE XXVII

HAPPY 100TH ANNIVERSARY OF THE REPUBLIC OF TURKEY!

"One out of every ten women has endometriosis"

FOREWORD

Dear Colleagues,

We are delighted to welcome you to the 27th issue of the Turkish Endometriosis and Adenomyosis Society Bulletin.

In these historic days as we celebrate the 100th anniversary of our Republic, we remember with utmost respect and profound gratitude Mustafa Kemal Atatürk, the founder of our Republic, whose revolutionary steps in education and science paved the way for our nation to reach its present state.

The core theme of this milestone issue is designated as **"RADIOLOGICAL IMAGING METHODS IN ENDOMETRIOSIS AND ADENOMYOSIS"**. Diagnostic imaging protocols are of paramount clinical significance in establishing accurate diagnoses and scheduling customized therapeutic interventions. In recent years, advanced ultrasonography techniques have come to the absolute forefront, particularly in mapping nodules in deep infiltrating endometriosis and evaluating adenomyosis structural variants. Accordingly, this issue compiles recent breakthrough global literature and key radiological study reviews.

Furthermore, this issue features a highly prestigious and exclusive interview. We had the privilege of speaking with **Prof. Dr. Ertan Sarıdoğan**, who is currently the President-Elect of the European Society for Gynaecological Endoscopy (ESGE), the Editor-in-Chief of the scientific journal **Facts, Views and Vision in ObGyn**, and an active member of the ESHRE endometriosis guideline development taskforce. We believe his global insights will be of great educational value.

We hope this scientific resource serves as an exceptional guide for our entire medical, radiology, and academic community.

Best regards,

Executive Board of the Turkish Endometriosis & Adenomyosis Society

FEATURED CONTENT & BULLET POINTS

- **Main Scientific Theme:** Radiological Imaging Methods in Endometriosis and Adenomyosis (Focusing on specialized transvaginal sonography and pelvic MRI protocols).
- **Centennial Milestone:** Tribute to the 100th Anniversary of the Republic of Turkey and its vision for academic excellence.
- **Exclusive Expert Panel:** Comprehensive academic interview featuring Prof. Dr. Ertan Sarıdoğın (UCLH, London / ESGE President-Elect).

EXCLUSIVE ENDO-EXPERT INTERVIEW PROFILE

Interview Profile: Prof. Dr. Ertan Sarıdoğın

Academic Background & Global Roles: Prof. Dr. Ertan Sarıdoğın completed his specialized PhD studies at St Bartholomew's Hospital and the University of London. He currently serves as the President-Elect of the European Society for Gynaecological Endoscopy (ESGE) and holds the position of Editor-in-Chief for the peer-reviewed medical journals *Facts, Views and Vision in ObGyn* and *ESGE Vision*.

Guideline Development: As a leading global authority on reproductive surgery, Prof. Sarıdoğın actively participates as an expert author and panelist in the European Society of Human Reproduction and Embryology (ESHRE) endometriosis management guideline development taskforce. He has historically contributed as an author to three consecutive comprehensive international endometriosis clinical practice guidelines and previously held senior leadership roles in the British Society for Gynaecological Endoscopy (BSGE).

The Endometriosis e-Bulletin is developed periodically by the Turkish Endometriosis & Adenomyosis Society. For scientific inquiries, article submissions, or collaborations, please visit our official communication channels.
